

Leapster Explorer™ Mobile Learning Centers

Help students sharpen the skills they need for a lifetime of learning!

LeapFrog's Leapster Explorer™ is an entirely new experience in mobile learning—sturdy enough for classroom use by 4-9 year old children, yet still delivering the latest in high-tech design, including our biggest and brightest touch screen and a Linux-based operating system. The handheld boasts Flash capability and a peripheral slot for accessory add-ons like a camera/video recorder. It comes with a Leaplet™ learning app card for a choice of downloadable e-Books, videos, flash cards, or mini games.

In addition, the Leapster Explorer handheld adapts to individual needs and uses dynamic leveling to ensure students are challenged at their own pace. The individualized learning and highly engaging environment facilitate independent learning to help all students reach their potential.

The Leapster Explorer™ Grade Level Mobile Learning Centers make it easy to add this age-appropriate, screen-based technology to the classroom. By combining learning games with state-of-the-art graphics and favorite characters, the centers spark motivation and ongoing engagement as students work their way through math, spelling, reading, social science and critical-thinking curricula.

Picture above represents only one of the Learning Centers. In an effort to continually improve our solutions, items may vary from the images. See the next page for a complete list of each center's contents.
